

SharePoint KM for PATROL

Release Notes

Version 1.0.01

May 2010

Release Notes for v1.0.01

Changes and Improvements

- The statistical method of measurement for root site that are not admin have been improved
- The calculation method of the TimeSinceLastHit parameter (SEN_WSS_SITE class) has been improved to reflect accurately the time elapsed since the last hit and the current polling
- A more exhaustive set of events is now considered in the analysis of the Event Log for Microsoft Office SharePoint Server and SharePoint Portal Server 2003 users

Fixed Issues

- The Modify Thresholds KM Command did not list collectors anymore
- In some specific situation, the View SharePoint Events KM Command did not list the entire list of SharePoint events
- When Microsoft IIS logging format was W3C, the LastAccessDate (SEN_WSS_WEB class) parameter was not properly collected
- The Discovery process was not able to access the Windows Registry on Windows 2008 servers
